

Puneet Kumar Deshiya

Senior DevOps Engineer | AWS Cloud Engineer | Platform Engineer

puneetdeshiya@yahoo.com | +91-7983328185 | Village + Post Kairi, Shamli, Uttar Pradesh 251305, India

PROFESSIONAL SUMMARY

Senior DevOps and AWS Cloud Engineer with 8+ years of experience building, automating, securing, and operating modern cloud platforms. Experienced in AWS architecture, Kubernetes, infrastructure as code, CI/CD, GitOps, observability, and production reliability engineering.

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer

IDX

Sep 2023 - Present

- Lead the design and operation of secure, highly available AWS cloud infrastructure for production workloads.
- Architect and manage Kubernetes platforms on Amazon EKS, including cluster reliability and scaling.
- Define and improve CI/CD standards using Jenkins and GitHub Actions to enable reliable releases.
- Drive infrastructure automation with Terraform, GitOps practices, monitoring, and incident-response improvements.

DevOps Engineer

Sinch

Jan 2020 - Aug 2023

- Managed Linux servers and cloud environments to maintain stable, secure application platforms.
- Built monitoring and alerting with Prometheus, Grafana, and CloudWatch to improve service visibility.
- Automated routine deployment and operational tasks with Python, Bash, and infrastructure-as-code tooling.
- Maintained CI/CD pipelines, supported releases, and troubleshoot production issues to improve deployment reliability.

System Administrator

Hitech Infomatic Pvt. Ltd.

Jan 2017 - Jun 2019

- Administered Linux servers, user access, patching, backups, and routine system maintenance.
- Configured network services, DNS, firewalls, and connectivity for business systems.
- Monitored production servers, resolved incidents, and documented operational procedures for reliable support.

TECHNICAL SKILLS

Cloud: AWS, Azure, GCP

Containers: Docker, Kubernetes, Helm

CI/CD & GitOps: Jenkins, GitHub Actions, GitLab CI/CD, Argo CD

Infrastructure: Terraform, Ansible, CloudFormation

Observability: Prometheus, Grafana, ELK Stack, CloudWatch

Systems: Linux, Ubuntu, CentOS, Amazon Linux

Automation: Python, Bash, YAML, JSON

Networking: VPC, Route 53, Load Balancer, VPN, DNS

CERTIFICATIONS

- AWS Solutions Architect Associate

- AWS DevOps Engineer Professional
- Certified Kubernetes Administrator (CKA)
- HashiCorp Terraform Associate
- Red Hat Certified Engineer (RHCE)
- Microsoft Azure Administrator

SELECTED PROJECT HIGHLIGHTS

- AWS Kubernetes Platform — scalable Amazon EKS platform with automated provisioning, monitoring, and secure delivery.
- GitOps Delivery Pipeline — controlled application delivery using GitHub Actions, Argo CD, Docker, and Kubernetes.
- Cloud Observability Stack — actionable dashboards and alerts using Prometheus, Grafana, CloudWatch, and Alertmanager.
